Storytelling

- We will share a VŠE experience by telling a story about it. The story will be about a presentation or training.
- Pick a story that can be described as one of these three.....The Good, The Bad, and The Ugly.
- Discuss what you learned from this experience.

THE GOOD,
THE BAD AND
THE UGLY

THE GOOD
THE BAD
AND THE UGLY

The Voice Is Your Most Powerful Weapon

Jorge H. Cooper

dynargie

Voice Tone

Voice Tone is the mood or emotion underneath your words. The tone could reveal many emotions including happy, sad, positive, sad, confident, frustrated.

Example:

I am very happy to be here today.

Voice Inflection

Voice Inflection occurs when someone stresses a certain word by changing their pitch or loudness when saying that word.

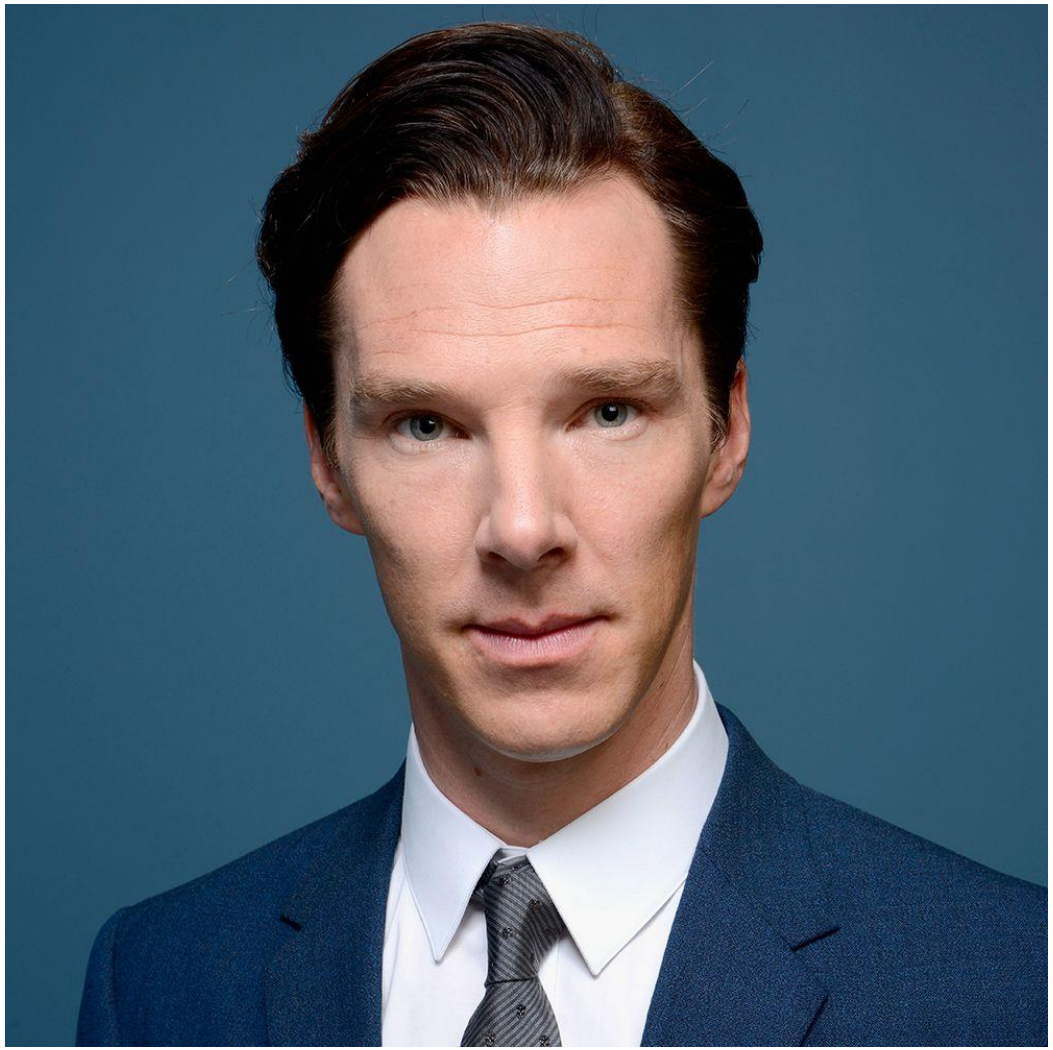

Example:

We have excellent trainers who conduct online VŠE product training.

Words that help or hurt presentations

POSITIVE PHRASES	NEGATIVE PHRASES
We are very happy with this	It has not been a smooth transition
We are a market leader	I do not agree with this approach
We value our clients	Clients change their minds a lot
Mainframe wil benefit from AI	AI is creating chaos in the industry
We acquired a strategic partner	We made a mistake
We are excited about	It does not work very well
I think you will like this new product	You are wrong
We are expecting a good year	It is not my fault
Want to learn more?	That will not work
We love innovation	There is nothing new going on here

The Power of 3

Most people forget the message of your presentation. There is too much information to digest and too many distractions along the way. Make it easier for them to remember your message with the Power of 3. Examples....Topic Purpose Target. Past Present Future. Problem Solution Benefits.

What is the Meta Message?!

A **meta-message** is a second or deeper message underneath the words. In many cases, the meta-message or subtext, is more important than the text. In other words, you must read between the lines and see what the customer is really saying.

Try to read the person's facial expressions and body language.

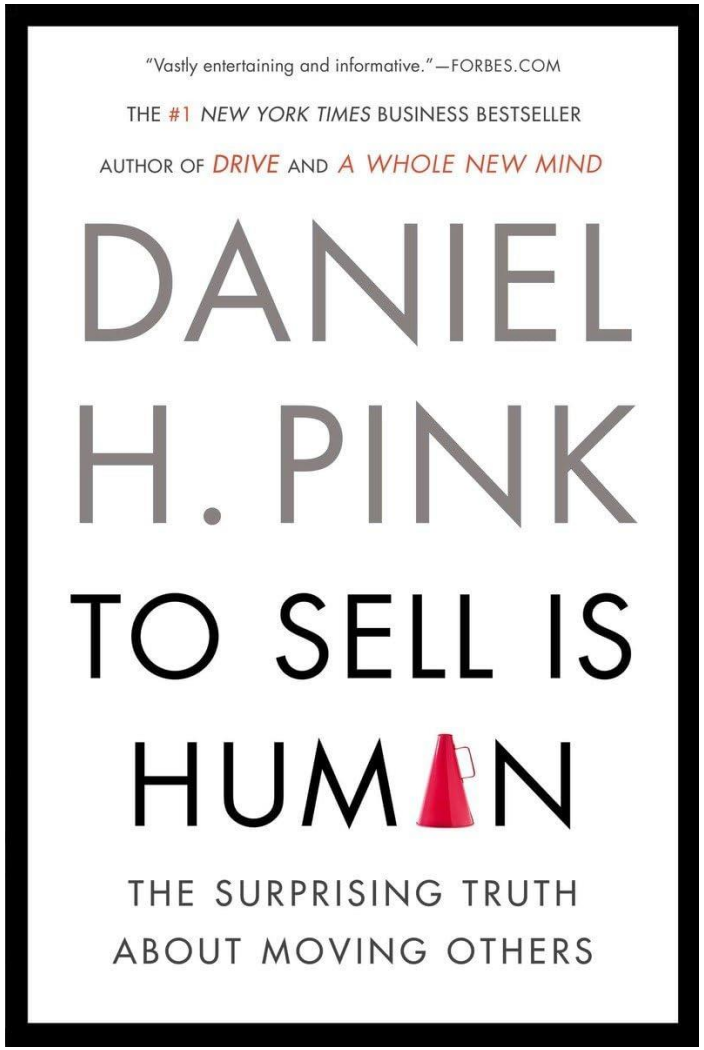

Meta - message

Everything we do and say has a second meaning.

What is the meta-message behind the following photos?

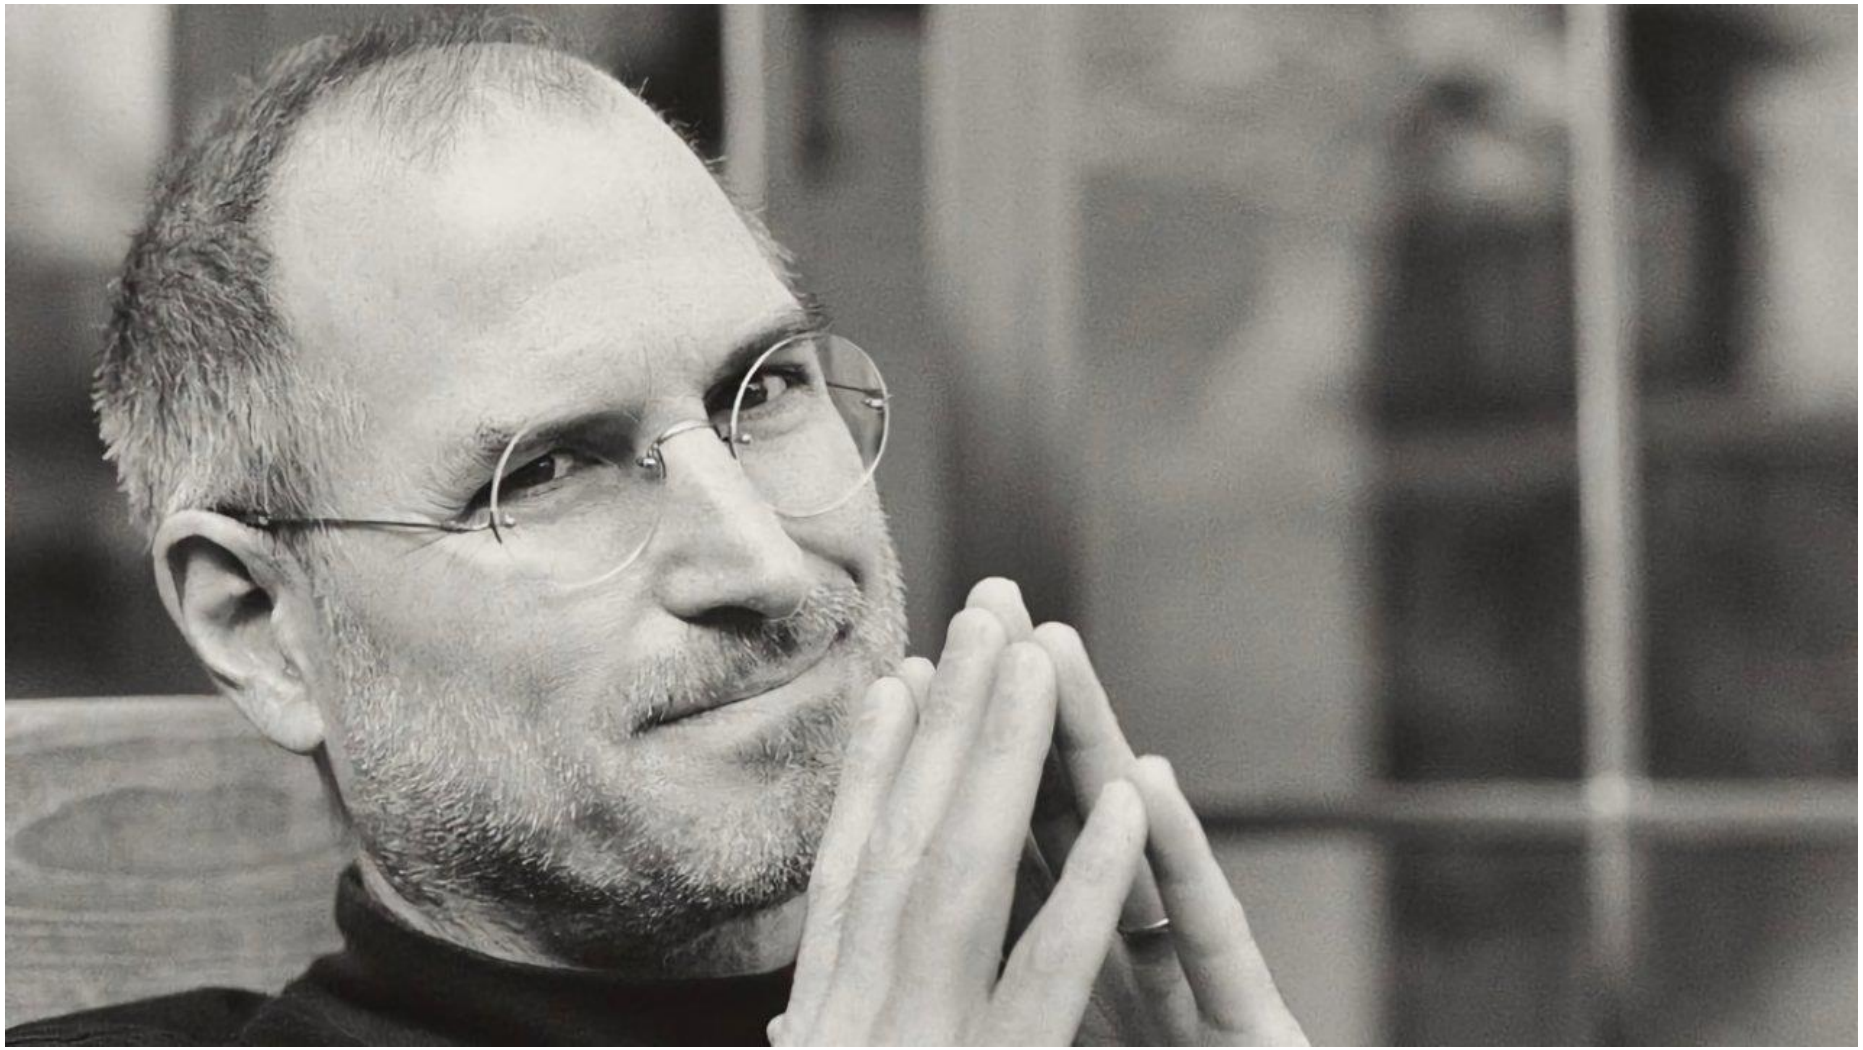

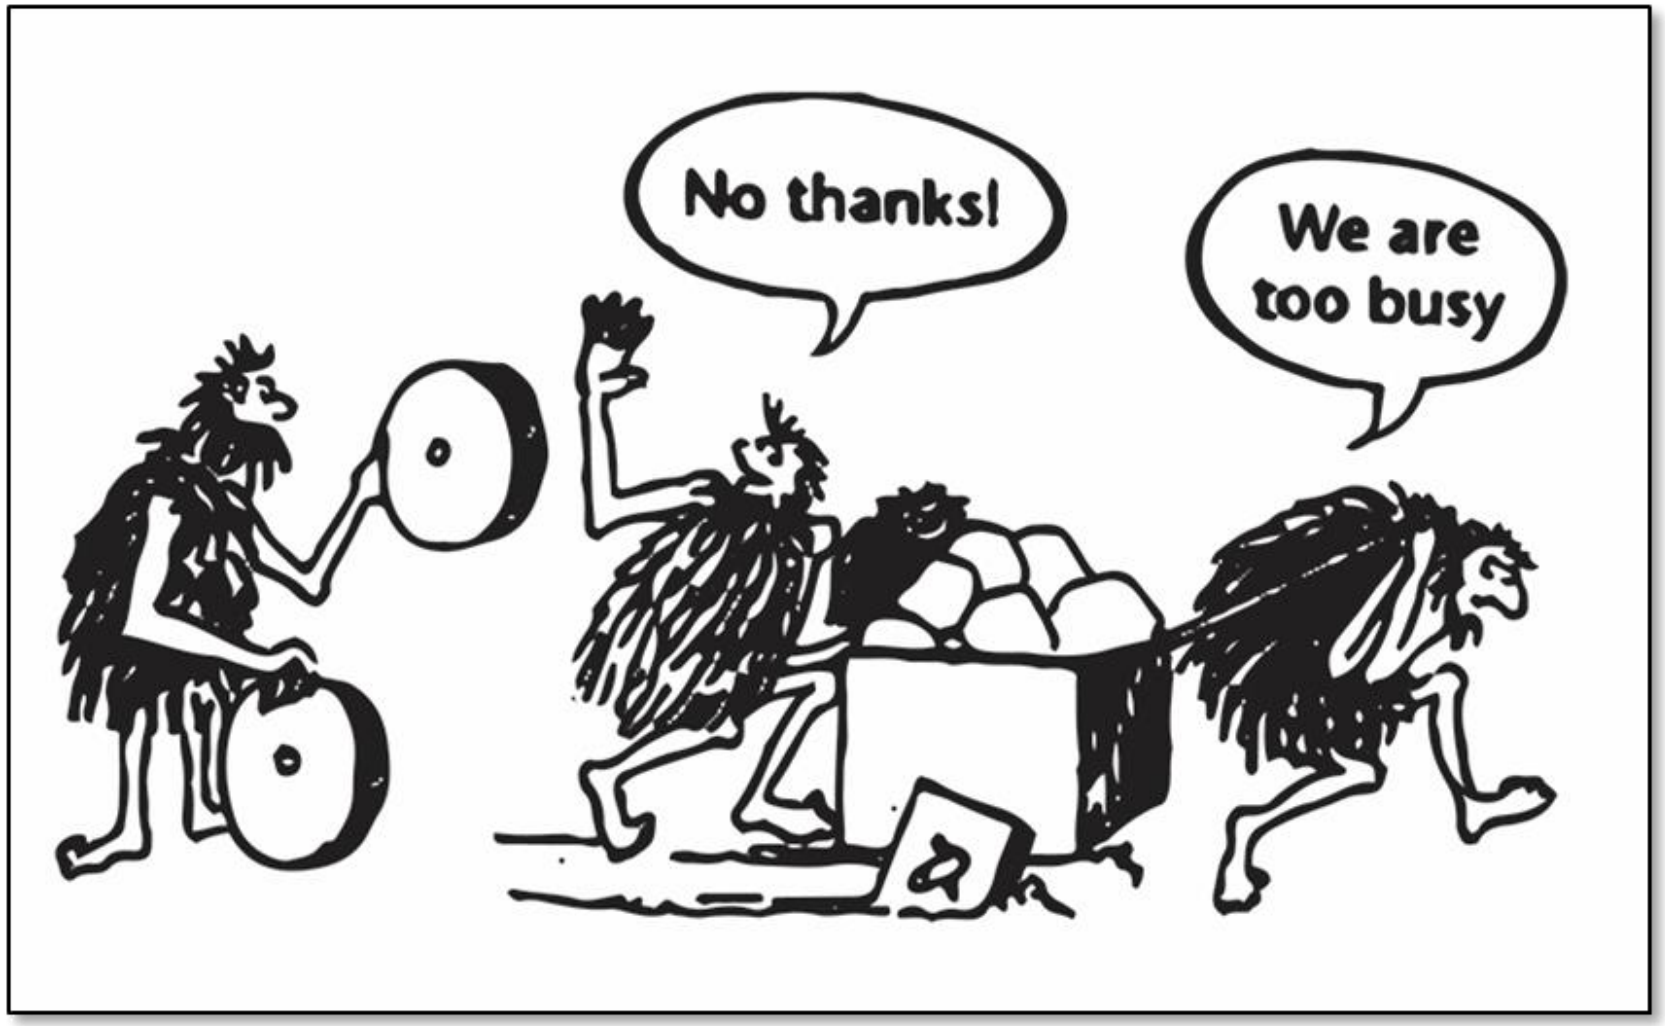

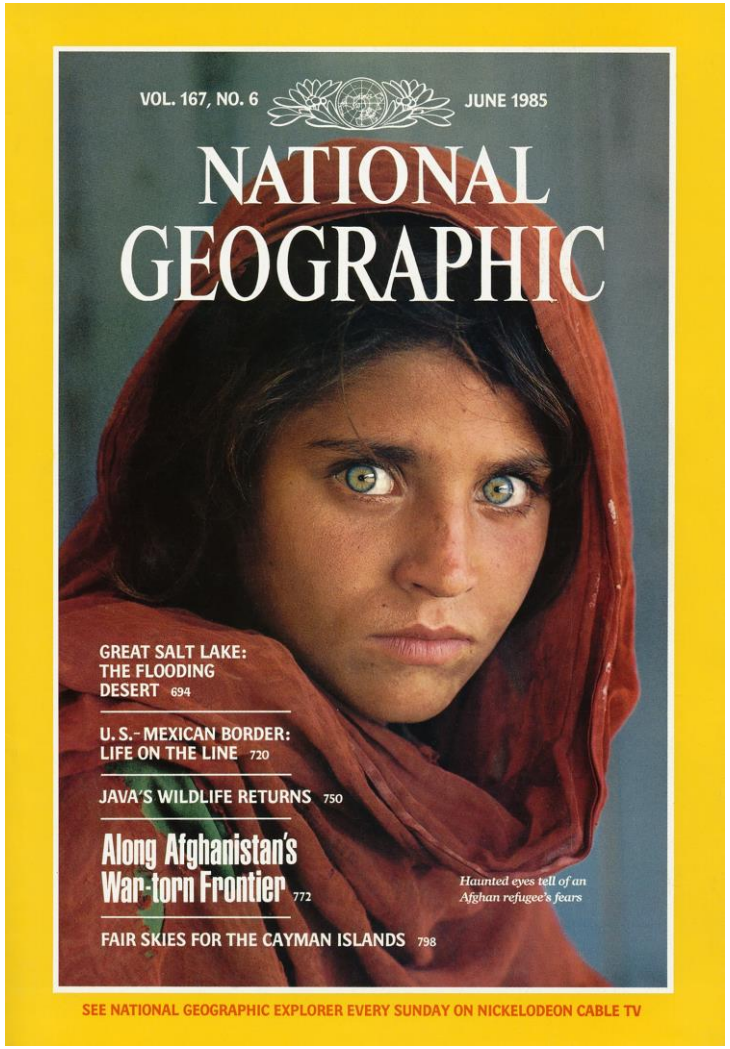

"Vastly entertaining and informative."—FORBES.COM

VIRTUAL BODY LANGUAGE

cuz your body speaks louder online

Back up!

It will be easier for your colleagues to see and understand your nonverbal signals if they see more of you

Sit up straight!

A good posture projects confidence, enthusiasm and health. Your voice will also sound better

Smile!

Facial expressions seem to be amplified by the screen. It's better to have an amplified smile than an amplified frown

Look at the camera!

Instead of looking at the face on your screen. This helps you look as if you are keeping eye contact

Stop touching your face!

Smoothing your eyebrows, tugging at earlobes, itching your nose, chewing on their lower lip, etc., can be perceived as insecurity and incompetence

Use your hands!

Arm movements and hand gestures, are nonverbal signals of credibility and openness. Keep them relaxed, too much gestures look jerky online. Pay attention to your virtual background definition – it may interfere with you image in front of the camera

Originally a Chinese Proverb, Confucius said:

“I hear I forget, I see I remember,
I do I understand.”
